

**ar**  **max**  
AROMATIQUE & ACTIF

The logo features the word 'ar' in a bold, black, lowercase sans-serif font. To its right is a red spiral graphic, which is a smaller version of the background spiral. To the right of the red spiral is the word 'max' in a bold, black, lowercase sans-serif font. Below 'max' is the tagline 'AROMATIQUE & ACTIF' in a smaller, red, uppercase sans-serif font.

" natural aromatic and active ingredients, flavors and fragrances "

Raw materials

- Essential oils and extracts
- Isolates and natural aromatic molecules
- Floral waters and vegetable oils
- Plant extracts

Perfumes

Flavors

# The company

- **Founded 15 years ago:**

Born with the new millenium, the company AROMAX was created in 2000 by Jean-Louis Matout, translating his desire to share his expertise in matters of natural aromatic and active ingredients, perfumes and flavors.

Based in Sophia Antipolis, at the heart of Europe's leading technology park and just a few minutes from Grasse, AROMAX occupies a unique position at the crossing of the roads, between **product innovation** and **decades of experience**.

- **Our mission:**

AROMAX develops and offers bespoke "**product-solutions**" in the field of natural aromatic raw materials and active ingredients, perfume compositions and food flavours to satisfy the specific requirements of its clients, in both traditional and innovative sectors with the aim of contributing to the success of their products.

To achieve this, AROMAX provides them with a wide range of **raw materials**, one which is regularly improved to respond to its clients' diverse request, including essential oils, isolates and natural aromatic molecules, floral waters, vegetable oils and plant extracts, but also standard or 100% natural **perfumes and flavors**.

AROMAX's constant innovation is also recognised through the continued support of OSEO INNOVATION.

# The company

- Our clients:

Thanks to our flexible approach, we are organised to work with businesses that are small, medium or big in size, both in France and abroad, in sectors as varied as:

- perfumery
- cosmetics
- well-being
- human and animal health
- food
- natural plant care

- Our goal:

AROMAX aims to develop **strong partnerships** that guarantee clients an out-sourced solution that is both **complete and flexible** - in short, 100% made-to-measure!

To this end, from defining the desired product right through to delivery, we guarantee our clients:

- the right quality for the concerned project
- the exact desired quantity
- a fair price
- the best delivery times
- the complete management of the order

# Essential oils and extracts

- Essential oils

AROMAX can supply practically all types of essential oils produced in the world in any quantity to its clients, guaranteeing the chemotype, purity and source.

- Extracts of oak and sweet chestnut

- French oak heartwood (Quercus Robur)
- American oak (Quercus Alba)
- Sweet chestnut (Castanea Sativa)

**Active ingredients** – antioxidants, astringents, anti-radicals, rich in polyphenols (flavonoids) and anthocyanins (skincare cosmetics, make-up) – **and aromatics**, these bring a unique woody character to perfumes and flavours, with the “ highly natural ” and original accords of vanilla, whisky-lactone, syringaldehyde or furfural.

# Perfume compositions

AROMAX has a vast collection of olfactory accords and develops customised creations that naturally conform to I.F.R.A., R.I.F.M. and E.E.C. recommendations and legislation and are suited to the products concerned.

They are designed for applications as diverse as:

- Extracts, eaux de toilette, eaux de Cologne, alcohol-free perfumes
- Shampoos and personal care products, bubble baths and shower gels
- Cosmetic products, creams, milks, lotions, body deodorants
- Soaps, liquid soaps, household soaps
- Liquid and powder detergents, dishwashing liquids and floor cleaners
- Fabric softeners

and many other products such as insecticides, air fresheners, perfumed candles, ...

# Food flavors

Likewise for food flavours, AROMAX has a vast collection of flavours and develops customised creations that all conform to F.E.M.A. et E.E.C. regulations and are suited to the products concerned.

They are designed for applications as diverse as:

- Acid drops, toffees, fillings, chocolates, chewing gums
- Biscuits, cakes, crackers, breads, icings, pastries
- Non-alcoholic drinks (fruit juices, fizzy drinks, flavoured sparkling and still water) or alcoholic drinks (liquors)
- Ice creams and sorbets
- Dairy products: yoghurts, flavoured milks, milk-shakes, pouring yoghurts, creams, flans
- Pharmaceutical and nutraceutical products

and many other products such as cattle feed and pet food, fishing bait, ...
